

ONSITE TRACK EASY

CONFIGURATION GUIDE
V1

PegasusTM
an Avetta Company

Connecting a competent workforce

Notes

Steps in this guide will require the user to have Site or Realm permissions that allow them to modify or change the topics covered in this guide.

Check to see what permissions you have, to see what you might be able to modify if required.

Having Editor Rights and permissions to Edit Realm or Site Settings is what is being focused on in the following pages.

Details on Realm or Site user permissions can be found on the support page:
<https://kb.pegasus.net.au/display/CA/User+Account+Permissions>

- See your user permission under Person > Users in Onsite Track Easy and then look up your account.

REALM OPTIONS OVERVIEW

Realm Configurable Settings

Ensuring you have an appropriate Realm account, click on Setup > Realm to review the Realm settings.

If you don't have editor access, you can still view the Realm configuration.

- Typically Realm settings should only be modified by the appropriate Pegasus Account Manager, or your Pegasus Super Users or Admins for your Realm.

Realm Configurable Settings

5 x tabs are available.

General – Settings used for managing global notifications, contact details for the Main Administrator and some optional items that can be enabled.

Add-ins – See what options have been enabled for your Realm by Pegasus

Sites - see which sites this realm operates over

Card Designs – View the card layout that will be printed for workers

Compliance – If enabled, see the configuration of the Company Compliance Source

- Note that not all options are enabled for Realms. This highly depends upon the configuration of the Client and what options they have enabled for them.
- If unsure, reach out to your Pegasus Account Manager for more information.

Expiry Reminders

Comp Reminders Enabled:	✗
Cert Reminders Enabled:	✗

Realm Configurable Settings - General

Configurable Items section – Competency Expiry Reminders

- Expiry Reminders can be enabled for Employees and /or Contractor Companies. Typically it is not configured for Employers/Employees, as Clients Manage their employees compliance. It would be enabled to send Contractors notifications that their competencies are due to expire.
- Can set the reminder notification intervals.
- Can edit text that will appear with the email reminding worker of expiring competencies

Expiry Reminders

Comp Reminders Enabled: Tick to email reminders to contractors when their expiring competencies are due to expire.

Comp First Reminder Date: Days Before Expiry (14-60)

Comp Final Reminder Date: Days Before Expiry (7-30)

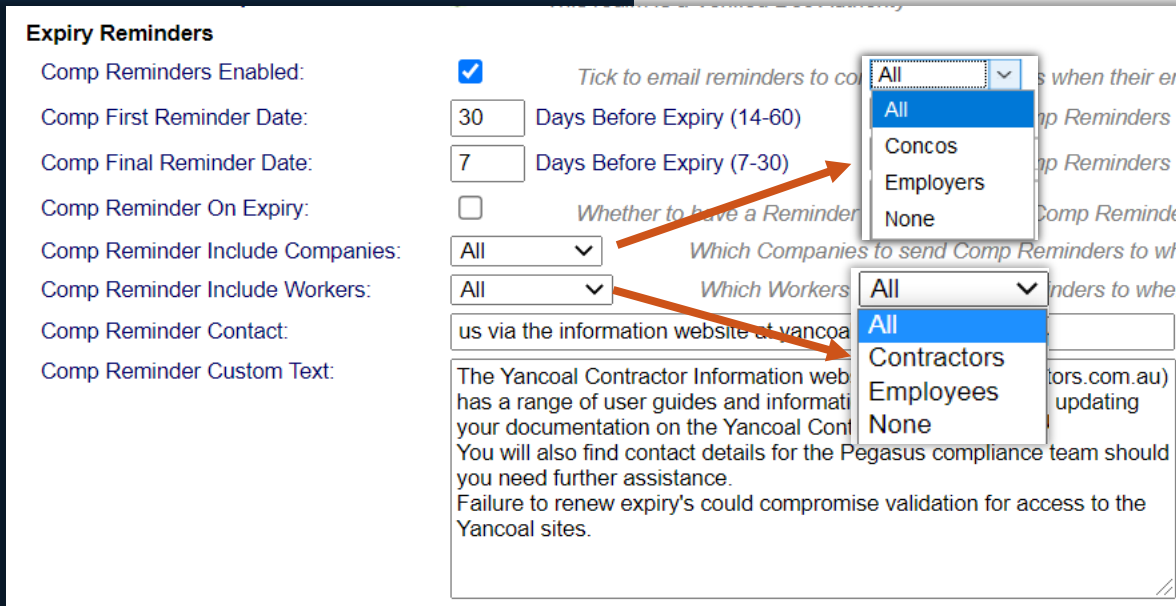

Comp Reminder On Expiry: Whether to have a Reminder on the day of expiry.

Comp Reminder Include Companies: Which Companies to send Comp Reminders to when they expire.

Comp Reminder Include Workers: Which Workers to send Comp Reminders to when they expire.

Comp Reminder Contact: us via the information website of yancoal.com.au

Comp Reminder Custom Text:
The Yancoal Contractor Information website (www.yancoal.com.au) has a range of user guides and information on the Yancoal Contractor Information website. You will also find contact details for the Pegasus compliance team should you need further assistance. Failure to renew expiry's could compromise validation for access to the Yancoal sites.

Realm Configurable Settings - General

Configurable Items section – Cert Expiry Reminders

- Certs (short for Certificates) is typically a legacy item used for managing Company Compliance. This has been superseded by Company Pre-Qualification.
- Certs operate similar to competencies, but are applied against a Contractor Company Companies > Contractor Company > and then under their Compliance Tab for that Company.
- If enabled can set messages and reminder notification email times.

Cert Reminders Enabled:	<input type="checkbox"/>	<i>Tick to email reminders to contractor companies when they have expiring</i>
Cert First Reminder Date:	<input type="text" value="30"/>	Days Before Expiry (14-60) <i>Applies to Cert Reminders when set to se</i>
Cert Final Reminder Date:	<input type="text" value="7"/>	Days Before Expiry (7-30) <i>Applies to Cert Reminders when set to se</i>
Cert Reminder On Expiry:	<input type="checkbox"/>	<i>Whether to have a Reminder On Expiry, when Cert Reminders are set to s</i>
Cert Reminder Contact:	<input type="text" value="us via the information website at yancoalcontractors.com.au"/> <i>Ma</i>	
Cert Reminder Custom Text:	<div style="border: 1px solid #ccc; padding: 5px;"><p>The Yancoal Contractor Information website (yancoalcontractors.com.au) has a range of user guides and information to assist you with updating your documentation on the Yancoal Contractor Portal. You will also find contact details for the Pegasus compliance team should you need further assistance. Failure to renew expiry's could compromise validation for access to the Yancoal sites.</p></div>

Site Configurable Settings - General

Safety Sections is covered in another guide in full.

Auto logout configuration required a Pegasus account Manager to enable.

- All information on Safety Selections can be [viewed here](#) under the Safety Section of the page.
- Realm assignment steps if enabled will allow Roles to have additional steps (Assign, Authorise, Approve) required before they become Active.
- Auto Logout Configuration will automatically log out workers from Onsite Track Easy when reaching a times threshold. Can be set for time duration for worker, or for a specific time each day. Can only be enabled by a Pegasus Account Manager.

Site Configurable Settings - Fatigue

Location Specific Fatigue Alerts

- Used in conjunction with Setup > Alerts feature to trigger email alerts when worker ahs hit fatigue limits in site locations.
- Minimum Break – will display in conjunction with the logpoint message tick box, an alert on screen if worker has not had the sufficient break. Will not block them from site, but prompts on screen the alert.
- Minimum multi day break – calculates across the 7 day rolling period that worker has had at least on full day off.

LOCATION FATIGUE LIMITS

Onsite HQ hours and hours per week

- Admin hours and hours per week
- Factory hours and hours per week
- HQ Office hours and hours per week

The first value determines when a new login is a 'Period Start', and all values are used in fatigue report calculations

edit

SITE FATIGUE SETTINGS

Minimum Break Between Work

10:00 Hours *The logpoint's Fit For Work page will show the specified break period*

Minimum Multi-Day Break

24 Hours in any 7 Day period *The minimum break from work required at least once in the specified period*

edit

Site Configurable Settings – Emergency Evac

Generally this section is a legacy item.

- Superseded by the Onsite Now Feature in the Client Portal and the Pegasus Mobile app

EMERGENCY EVACUATION REPORT

There are two alternate methods for generating the emergency evacuation report:

1. **Users logged in to Onsite** can generate this report from the **emergency evacuation report** button on the left of screen.
2. **Any person** (including Onsite users who are not logged in and persons without an Onsite user account) can generate this report from

Shortcut URL: <https://secure.onsitetrackeasy.com.au/emergencyEvac.jsp?s=9&p=emB47>

change password

This will reset the password for the emergency evacuation report shortcut

EMAIL ADDRESSES

- The emergency evacuation report can be emailed to any number of persons after it has been generated using method 1 or 2.
- An email will be sent to each of the addresses listed below by clicking on the **email** button in the report.
- Make changes to the email addresses by editing them below and then using the save button.
- Use a semi-colon to separate multiple email addresses.
