Person to Always be Selected**

# Safety Selections: Specify Person to Always be Selected

**Legacy Id** Legacy ID = (none specified) 

**Site Settings**  
Manual Login Manager:  For logpoints with no manual button

**Custom Fields**  
Car Rego:

**Custom Lists**  
Department:  
Shift:

**Safety Selections**  
Always Select:  **enable** Whether to select this person in every running Safety Selection  
(an Admin Note is automatically created when this is changed)

[edit](#)  [photo & card](#)

From the **Person** Menu > **Search and Select Person** from either Contractor, Employee or Visitor

You can specify that a person is pre-selected in **every** safety selection on your site.

This option can be accessed on their **General** view page, as shown here on a contractor's profile. There is a similar section on the view visitor page.

**Legacy Id** Legacy ID = (none specified) 

**Site Settings**  
Manual Login Manager:  For logpoints with no manual button

**Custom Fields**  
Car Rego:

**Custom Lists**  
Department:  
Shift:

**Safety Selections**  
Always Select:  **disable** Whether to select this person in every running Safety Selection  
(an Admin Note is automatically created when this is changed)

[edit](#)  [photo & card](#)

When you click the '**enable**' link the setting is immediately changed.

## Safety Selections: Specify Individual or Group to Always be selected

If a person is selected in a safety selection due to this setting, the '**basis**' will show as '**Perpetual**', and that person will continue to be selected every time they present for login at a logpoint that's running any safety selection on your site. As with all other selectees, once they've been processed, following selection, they may then login at a logpoint that's still running the selection for which they were processed.
