ONSITE TRACK EASY SOFTWARE LOGPOINT

USER GUIDE
V1.1

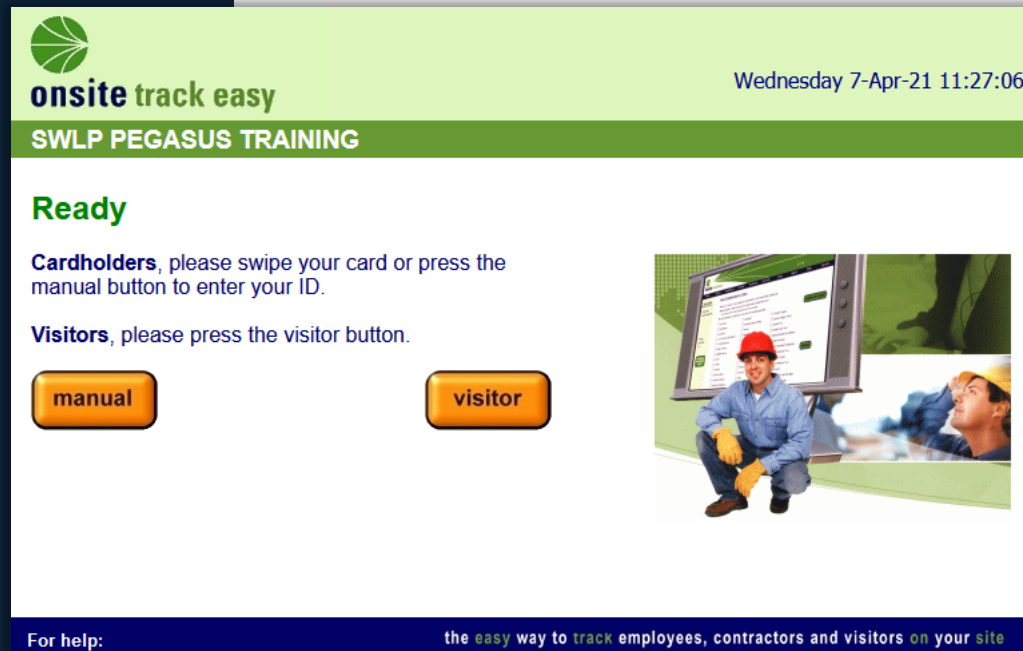

SETUP

Setup

A Software logpoint is a simpler version of a hardware logpoint.

There are some limitations, however the end result is that a worker is still checked for compliance, verified and then logged in to site, much like a worker would on a normal hardware logpoint.

- Software logpoints are configured the same as normal logpoints once they are enabled.
- Your Pegasus Account Manager will need to enable this feature for your site.
- If multiple sites are required, they will need to be enabled individually on each one. This is not enabled at the Realm level.
- This is currently NOT enabled in the Pegasus Client Portal.
- Software Logpoints are typically prefixed with **SWLP** in the logpoint name

The screenshot shows the 'onsite track easy' interface for 'SWLP PEGASUS TRAINING'. The top bar is green with the logo on the left and the date/time 'Wednesday 7-Apr-21 11:27:06' on the right. Below the bar, the word 'Ready' is displayed in green. Two instructions are provided: 'Cardholders, please swipe your card or press the manual button to enter your ID.' and 'Visitors, please press the visitor button.' Below these instructions are two orange buttons labeled 'manual' and 'visitor'. To the right of the buttons is a photograph of a construction worker in a blue shirt and red hard hat sitting next to a computer monitor displaying a software interface. At the bottom of the screen, there is a dark blue footer with the text 'For help: the easy way to track employees, contractors and visitors on your site'.

Setup

Once enabled, you will be able to see it on the Onsite Track Easy Homepage.

To check head to Setup > Site > Add-ins to see a list of enabled options and you will see it ticked if enabled

Software Logpoints

- The icon will appear on all Onsite Track Easy screens you operate when enabled.
- It sits above the Emergency Evacuation Report button.
- For every Location, a Software logpoint will be automatically generated once enabled.

The screenshot displays the Pegasus Training interface. On the left, a sidebar shows session details for 'app2' with user 'Damien Challen' and role 'Editor'. Below this is a 'change' button. The main content area has a 'Welcome to Pegasus Training' header with 'general' and 'charts' tabs. A red notification banner reads 'Pending Data / Incomplete Actions' with a 'show' button. Below this, the 'Latest Version 2.178.4' section lists new features: 'Multiple Companies', 'Default Companies', 'End Employment', and 'Company Relationship Notifications'. At the bottom of the sidebar, a red box highlights a small thumbnail image of the Onsite Track Easy homepage, with a green button labeled 'emergency evacuation report' positioned directly below it.

CONFIGURING SOFTWARE LOGPOINTS

Configuration of a Software Logpoint

Head to Setup > Logpoints

You list of Hardware and Software Logpoints will appear here.

Click on the green name of the logpoint to view its configuration settings.

- Hardware Logpoints are configured by your Pegasus Account Manager.
- You can however edit individual settings if you have the correct user permissions, under Person > Users > and checking a user's rights.

✓ Can Configure **Logpoints**

- Otherwise you will only be able to view the configuration. Talk to your site /realm administrator if you think you need this changed.

▶ Click a **logpoint name** to view its details.

Configuration of a Software Logpoint

Once viewing the Software Logpoint, you can then choose to edit multiple settings.

NOTE: enabling some logpoint settings may stop workings attending site/logging on.

If in doubt, please discuss with our Pegasus Account Manager as to the configuration you are trying to implement.

- Details on each individual setting can be found in the appendix. Of this document.
- Are able to configure for the three people types – Employees, Contractors and Visitors.
- You **Cannot** implement Card/proximity readers, or Breathalizers with a software logpoint.

- Please stay close to your site contact at all times

[complete login](#)

■ Logging Out a Visitor

Logging a Visitor Out has some additional steps.

Visitor can possibly scan their printed sticker at a logpoint (if applicable)

Or enter in Visitor ID

Or re-type in same login credentials to match this earlier login.

- Once matched, press on that name to highlight and then press YES
- If not visible, press NO and can continue to enter in company and mobile information to more correctly match. However should match based upon First and Last name.

The screenshot displays the 'SWLP ADMINISTRATION' interface. At the top right, a green bar indicates '58 seconds to reset'. The main heading is 'Identify Visitor'. Below this, a message states: 'The system has matched the ID number you entered with the following Visitor. Is this you? If so, press **yes** to continue. If not, press **no** to try again.' A blue box contains the following information: '1: Status = Logged In (available to LOG OUT)', 'STEVEN SILVER, ID = 003 707 863', and 'SILVER ENTERPRISES, PH = 0420202020'. Below the blue box are two orange arrow buttons (up and down). At the bottom left is a 'no' button and at the bottom right is a 'yes' button. A footer at the bottom left says 'For help:' and at the bottom center is the text 'the easy way to track employees, contractors and visitors'.

Logging Out a Visitor

Once Visitor ID is confirmed, logout screens are same as contractor ones.

Press Log Out to finish time at site.

Final stats will show and press Complete Logout to finally sign Visitor out from site.

- If visitor does not press **Complete Logout** at the final “Logout Complete” screen, then when timer reaches 0 it will log them, out.
- Visitor can use that ID next time they attend/log into site.

Are You Ready To Leave Site?

- You have identified yourself as
STEVEN SILVER
- Your Onsite Visitor ID is 3707863
This can be used for future logins and logouts.
- Have a safe journey home

**Press 'log out' to log out now
(You are not logged out yet!)**

cancel log out

SWLP ADMINISTRATION 29 seconds to reset

Logout Complete
Thank you STEVEN SILVER,
You have now been logged out .

APPENDIX

Appendix – Logpoint Configuration Notes

General Configuration Section

- The Logpoint General Section contains elements that are only be managed by a Pegasus Support team member. Items such as NAME, TYPE, LOCATION, TIMEZONE, FONT COLOURS, LOGO, BACKGROUND, FONTS.

GENERAL	
Name:	SWLP ADMINISTRATION
Type:	Software
Location address:	
GPS coordinates:	
Timezone:	Australia/NSW
Language:	English
Sticker Printer:	none
Phone No:	
<input checked="" type="checkbox"/>	Enabled

- Phone Number: Is a field that can be configured. This will be a site-specific phone number that will be displayed on the Logpoints front page. Generally used for a site-based contact that manages the Logpoints.

Operation Configuration Section

- The Operation section is where you can define specific way that the Logpoint will work with the Onsite Track Easy system.
- Tap & Go Mode: This will just display the login and logout page, it will not show other pages on the logpoint. Does check competencies if the validate login is checked.

OPERATION	
Role Summary:	Logs IN or OUT
Dependency:	<input checked="" type="radio"/> None <input type="radio"/> In <input type="radio"/> Out <input type="radio"/> Out Others
Log Action:	<input checked="" type="radio"/> Toggle <input type="radio"/> InOut <input type="radio"/> In <input type="radio"/> Out <input type="radio"/> Move
Manual Button:	<input checked="" type="checkbox"/> Show on Home Page <input checked="" type="checkbox"/> Requires Desfire Card
Allow Use Of:	<input checked="" type="checkbox"/> Magstripe <input checked="" type="checkbox"/> Barcode <input checked="" type="checkbox"/> Prox <input checked="" type="checkbox"/> Desfire
Anti Passback:	<input checked="" type="checkbox"/> Contractors <input checked="" type="checkbox"/> Employees
<input checked="" type="checkbox"/>	Keep Home Page Alive
<input checked="" type="checkbox"/>	Page Timeout

- Dependency: 'In' will only allow you to login if you are logged out, 'out' will only allow you to log out if you are logged in, 'Out Others' will only allow you to login if you are logged out from all other site.
- Log Action: The 'In' and 'Out' them to only log in or out from specific logpoints. The 'InOut' is just a time stamp and mostly used for gate access.
- Manual Button: This allows the functionality of logging in/out with out a card and using just the Onsite ID number,
- The 'Requires Desfire Card' was developed for the Rail Industry to ensure people had an RIW card.
- Allow Use Of: This is the selection of the type of card you can use to log in/out.

Appendix – Logpoint Configuration Notes
