

Online Customisable Course Purchase

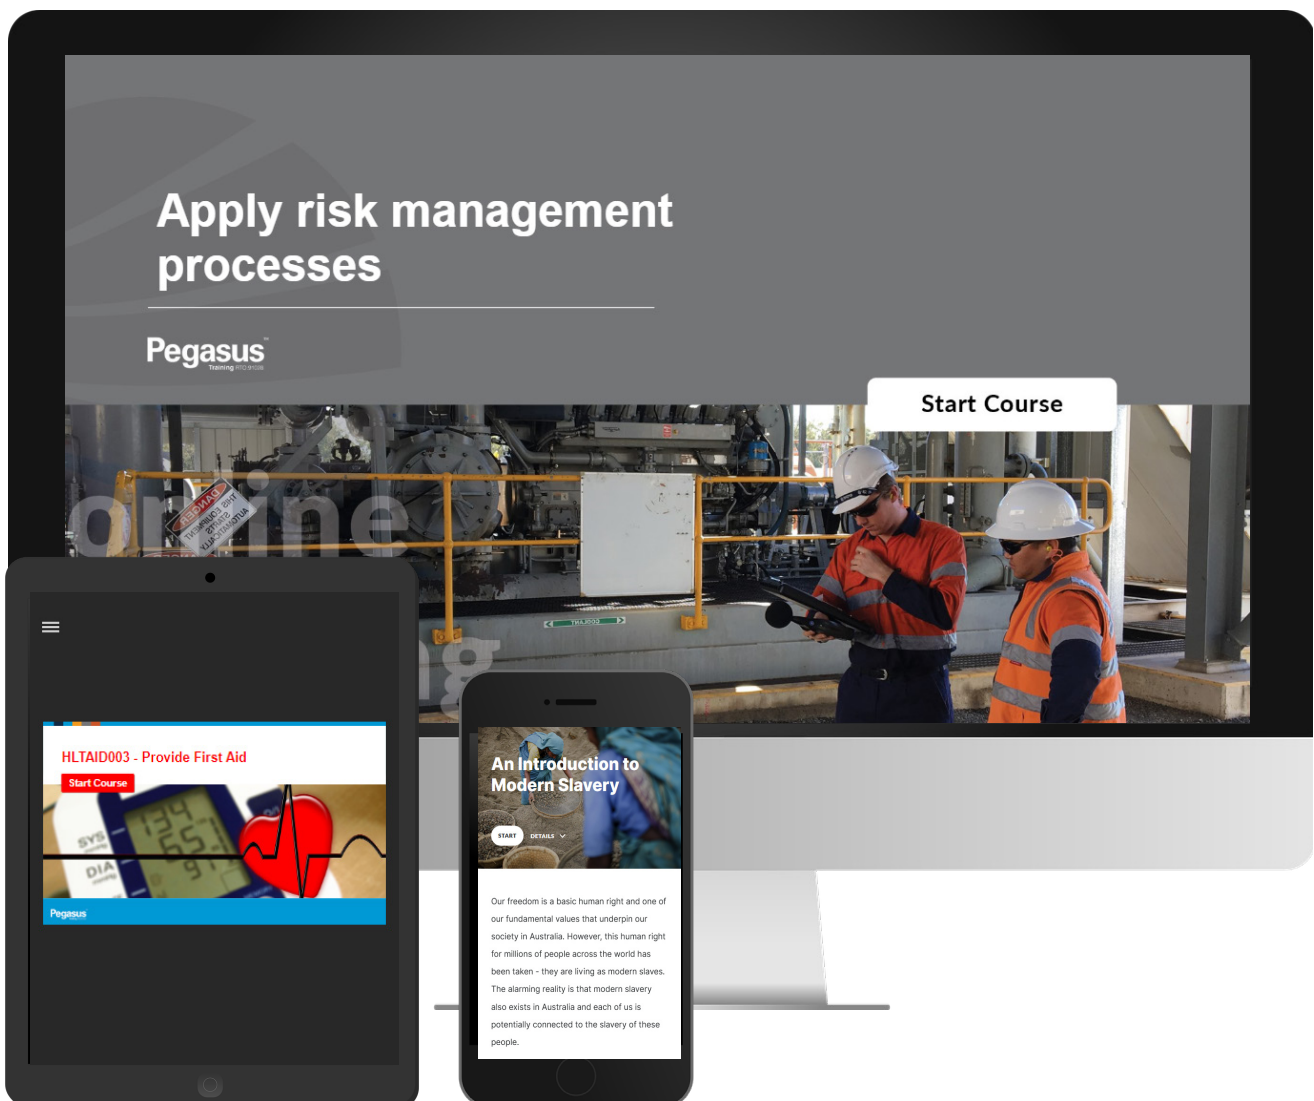

CONNECTING A COMPETENT WORKFORCE

ONLINE LEARNING

Don't spend time and money building an online course when one already exists.

Pegasus have a variety of online courses available for purchase at a one-off cost. You will be provided with your own source file, giving you ownership of the course. You are then able to customise the content to your organisation's unique needs as required. We're able to provide help with course customisation to streamline the process and get you to go-live quickly.

You can purchase the specific modules of a course, or the course in its entirety.
