

Onsite by Avetta – The Client focused mobile app provides users instant live access, to all compliance information, from Suppliers workers and their own employees companies and Assets if necessary

Your team has the data they need at their fingertips to log workers in and out, check competence, complete toolbox, fatigue, and evacuation checks, and to make informed decisions about the workforce on site

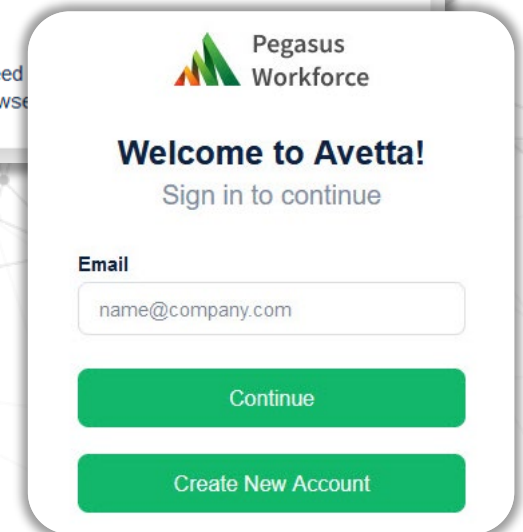

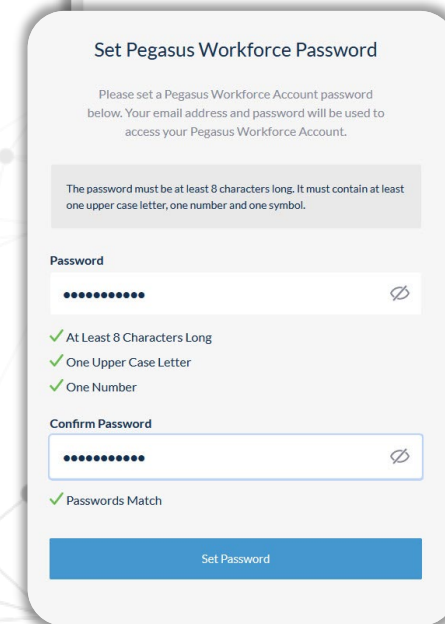

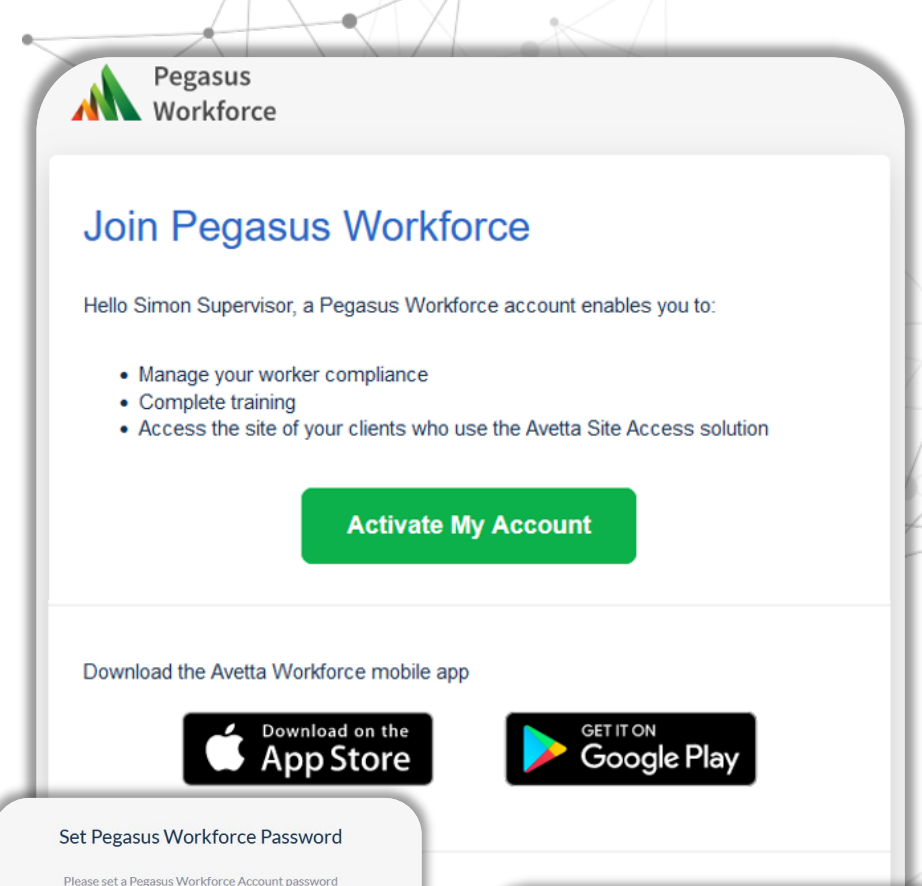

Client App [iOS Download](#)  
Client App [Android Download](#)

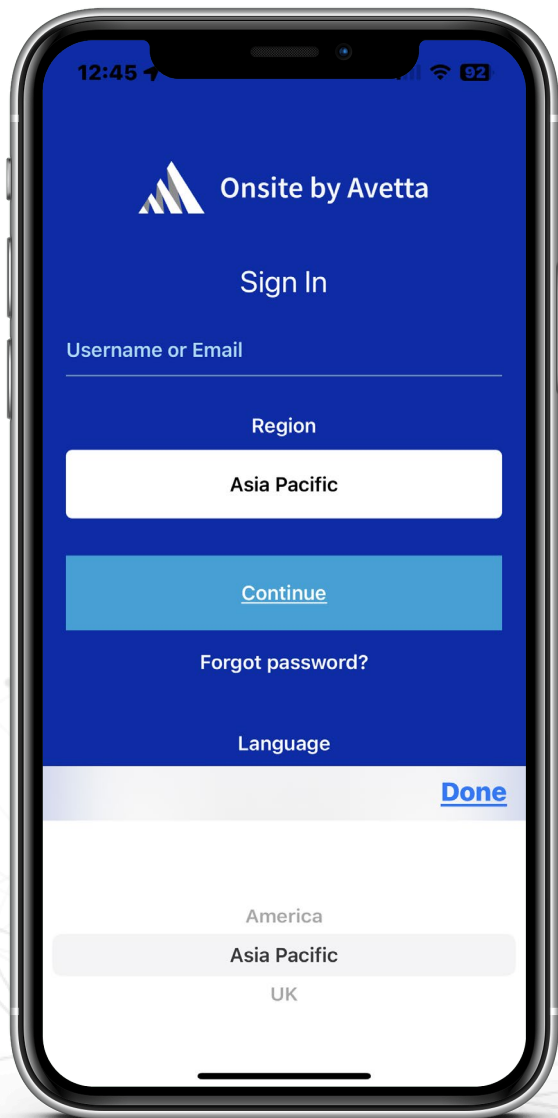

Invitation to access the Mobile App starts with an email requesting you to activate your Pegasus Workforce Account (previously called Pegasus Gateway Account)

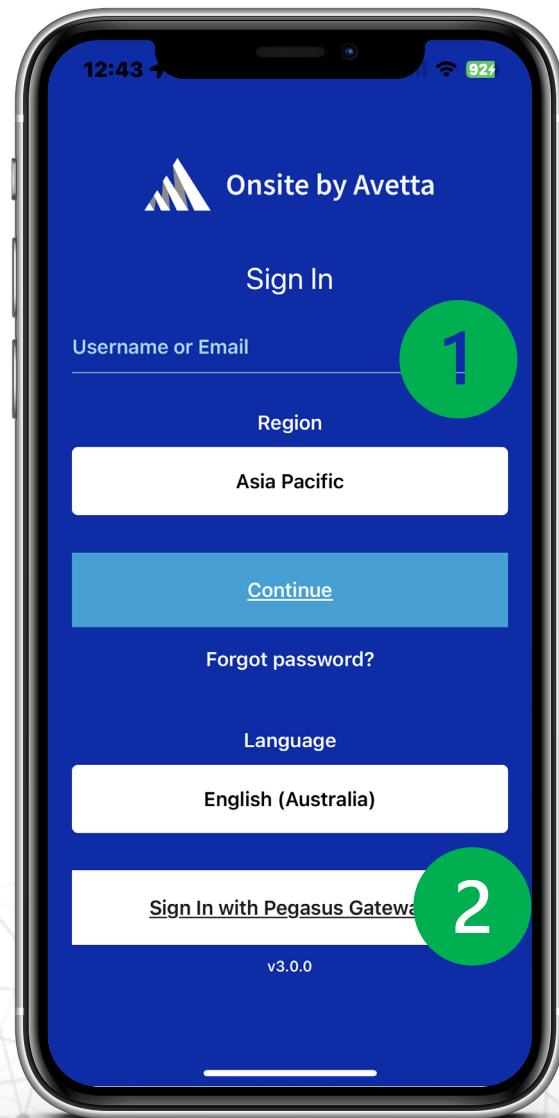

Create your personal password for that registered email address

Access will be granted to other Avetta tools such as Client Portal and Onsite, but for now, use this account for the Onsite Mobile by Avetta app

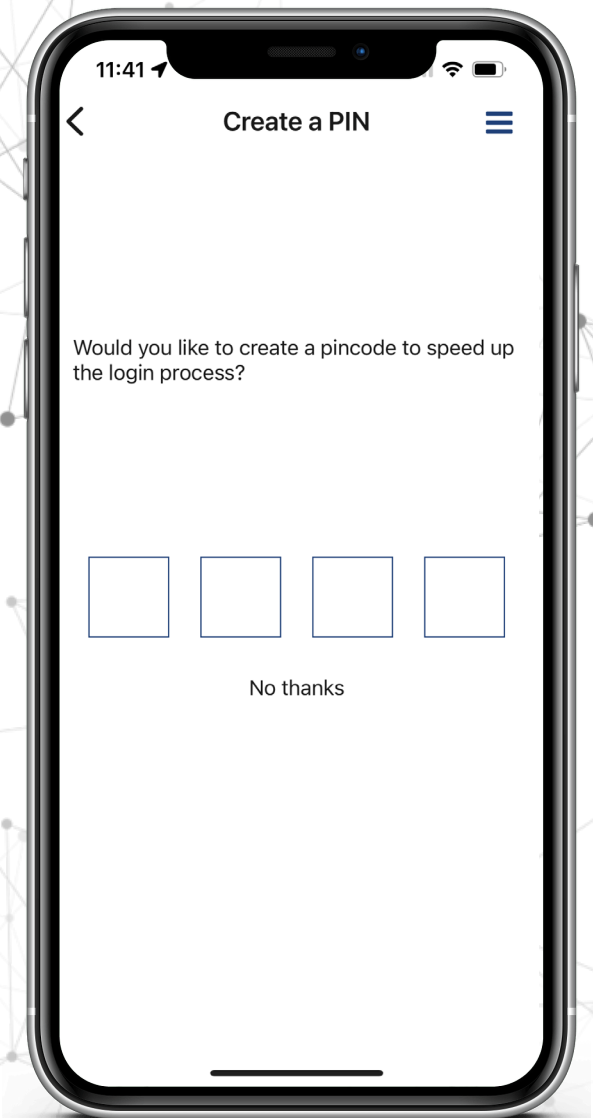

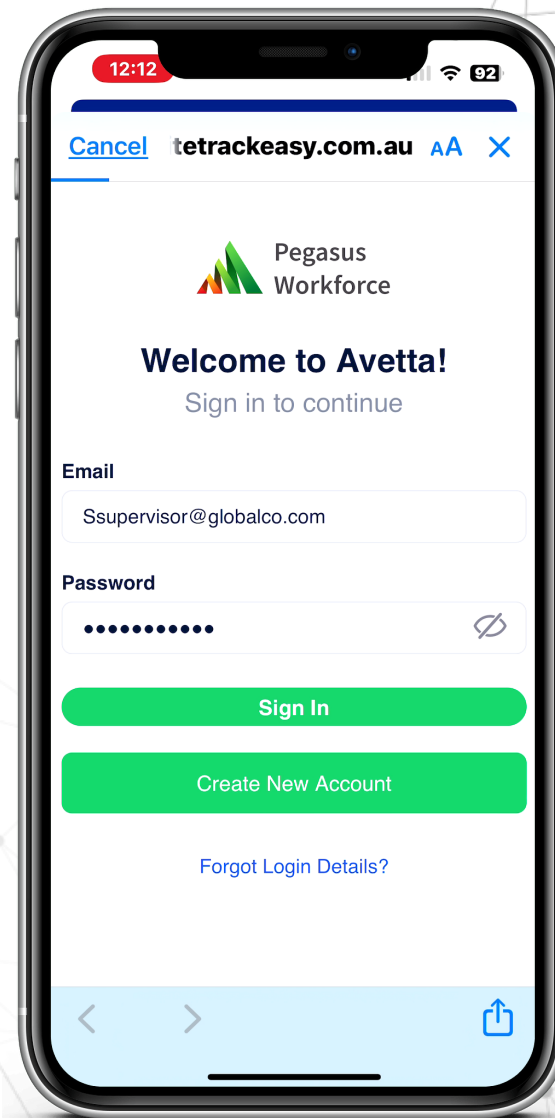

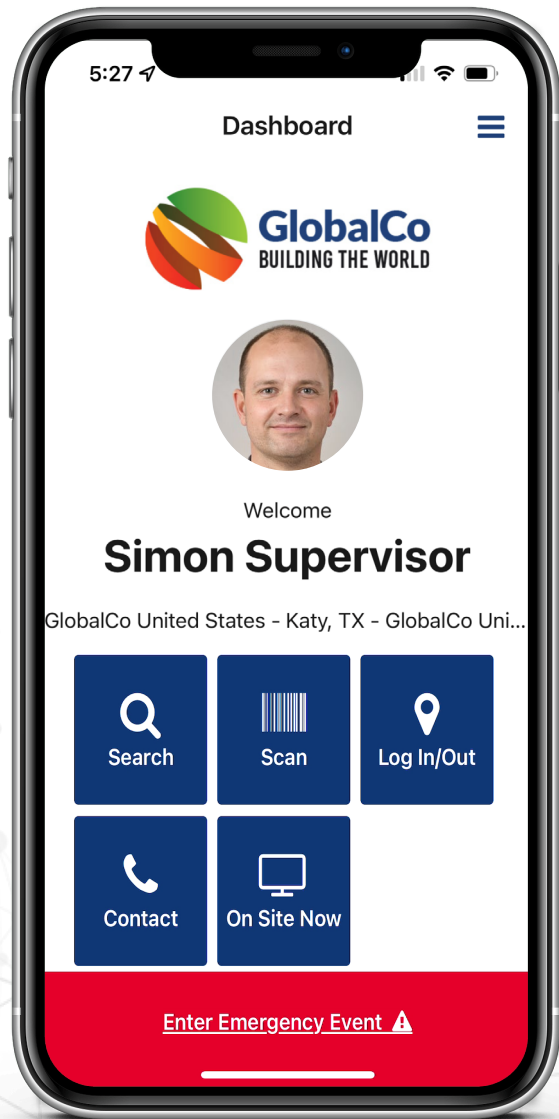

Choose region and language options if outside Australia

Sign in with your  
1. Onsite Account or  
2. Pegasus Gateway Account

Setup a Pin Code to save having to input credentials every time

Once in Home page shows location and your approved functions

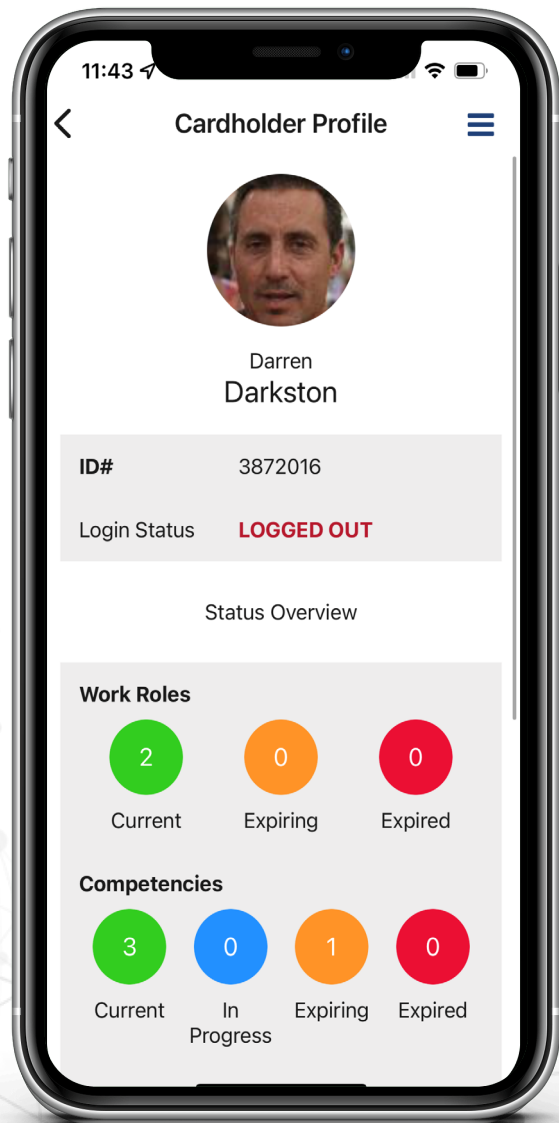

Can search for a worker or scan their QR Code to find them instantly

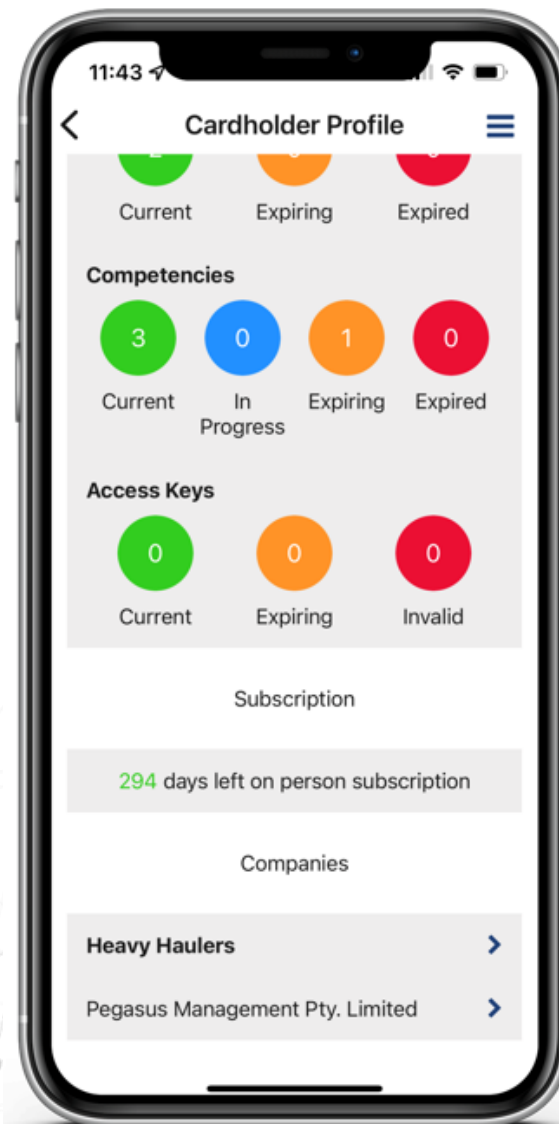

Contact easily brings up details for the Avetta support team for that Client

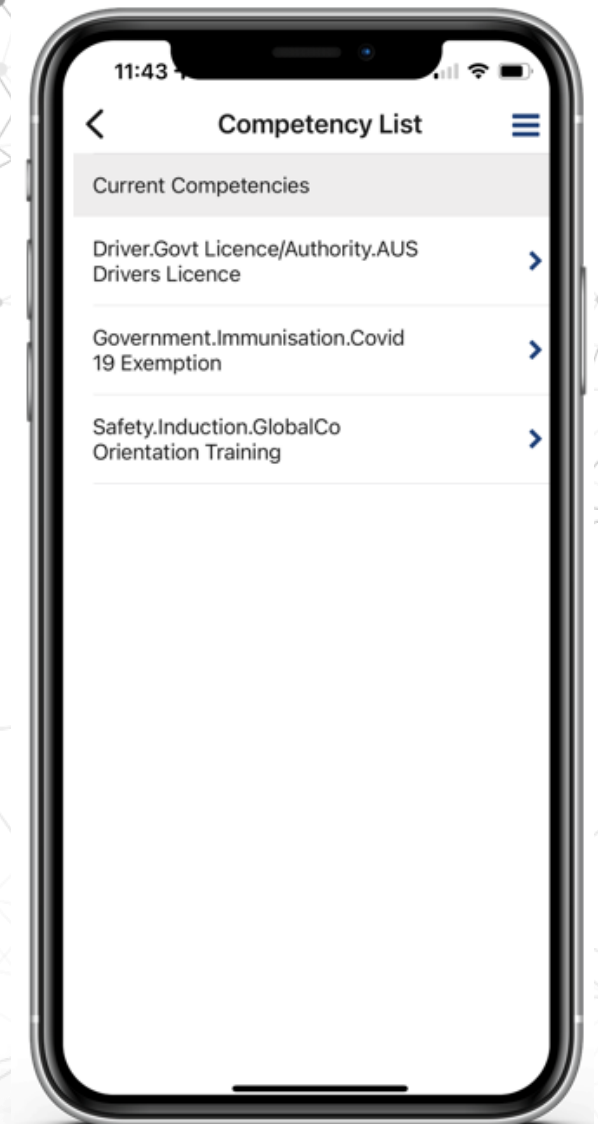

Once worker found, you can see photo, ID and site access status

Review Roles, Competencies, Access Keys and Company details

Investigate current Competencies in detail and review expiry dates where applicable

Sign out of the app from option button in top right.

Functions available all depend upon your permissions granted
