

Individual Worker Portal

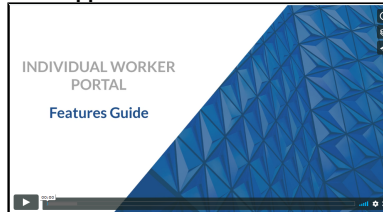

The Individual Worker Portal (IWP) is a new feature to help those Workers, that want to check their status, or edit their personal details, in the required Portals.

The Worker, once they have been invited to the Individual Worker Portal, by their Company Administrator, can then log into the relevant Contractor Portals, and see their status.

Not all Portals operate an IWP, you can see the list at the bottom of the page here:- <https://kb.pegasus.net.au/display/OCCS/Worker+Portal>
Once logged in however, the Worker can see their Role Status, Competencies, File Uploads and continue any online training if relevant.
