

Pegasus Gateway

Pegasus Gateway helps company administrators work more easily between multiple Pegasus portals with one user name and password. A valid email address is all that's required to register and then you can start adding the portals you need access to.

Terminology

 Pegasus Gateway = Avetta Account.
These two terms are both used to reference an account used to access the same Portal. The Workforce Management Pegasus Gateway is an Australian Term, Workforce Management Avetta Account is an American term.

Below is a video and PDF user guide to step you through the registration process and adding the appropriate portals

Been Invited to Activate your Avetta Account? Watch this video first to setup your access!
An Avetta Account is the Alternate Access to the Pegasus Gateway for some users.
